

VEGGIE U A+

Classroom Gardens
for Students with Autism

NEW!

Veggie U has taken 10+ years of experience in classroom garden education and applied it to the needs of the Autism Spectrum Disorder community.

The Veggie U A+ Classroom Garden program meets Ohio Educational Standards and Extended Standards with flexible lesson plans designed around varied learning styles, both verbal and non-verbal.

The Veggie U A+ program includes an extensive Teacher Guide, work sheets, activities, vocabulary and communication boards, Symbolstix™ characters, five Chapter Books, instructional videos, and an iPad app. Everything the teacher needs to grow a garden in the classroom is provided: a grow light, seeds, soil, flats, root viewers, and worms for a live worm farm.

The Veggie U A+ Classroom Garden is fun, engaging, and hands-on learning!
